

Join the Online Backup Revolution

Your Remote Backup Partner

Procom are now offering a cost effective remote backup solution which is already benefiting many of our clients.

Although some organisations still use tapes to backup their vital data, the switch to online backup services is gathering pace on a daily basis. Online backup is fully automated and scalable, and removes the time constraints, responsibility and labour intensive processes associated with tape backups.

Most importantly, your data will be protected offsite in our two highly secure geographically separate enterprise class data centres located in Manchester and London, where it will be available for restore 24 hours a day.

Because we provide 'best fit' solutions, we will analyse your needs then design and implement our online backup services in the most appropriate way.

Secure and ensure the integrity of your organisations data for as little as **£10.00 per month.**

For more information and pricing please contact our sales team on 01482 382050 or via sales@procom-it.com
